

ENTRIUM

Door Supplier

ABOUT ENTRIUM:

At Entrium, we redefine the art of everyday living through doors that blend **advanced technology master craftsmanship,** and **timeless design.**

Each piece brings **comfort, security, and elegance** into your home — created with **eco-friendly** materials and sustainable care for the environment.

Designed by **Ukrainian artisans** and trusted by **Canadian homeowners,** our doors stand for **lasting quality, refined style, and genuine value.**

We combine **personalized service, premium craftsmanship,** and AI-driven innovation to help you find the perfect door for your lifestyle.

TETRA

T-07

T-12

PL-02

The **TETRA Collection** features stile-and-rail construction (sometimes called assembled construction) interior doors with a decorative PVC finish (manufactured in Italy). This collection offers modern and classic designs in smooth, texture-free finishes, providing a versatile solution for any interior space. Glazed inserts (glass panels) give the models an airy and contrasting aesthetic.

The **PLATO Collection** features interior doors with a contemporary minimalist design. The model range presents flush door slabs faced with RENOLIT polypropylene film (Germany). These doors incorporate various combinations of aluminum inserts, glass, or mirrors that are positioned flush with the door slab surface.

The door edge (or stile edge) can be covered with an anodized aluminum profile or edging colour-matched to the face of the door slab.

They can be installed with a standard classic door frame and casings (trim), or with a concealed frame system (or pocket frame for hidden mounting).

Size: 18 × 80. 28 × 80. 32 × 80.
24 × 80. 30 × 80. 36 × 80.

RIO S LOFT

Anthracite Finish

Oak Finish

Technical Highlights

Available sizes: 34" × 81½" or 38" × 81½" (nominal)

Frame width: 4" (100 mm) curved steel profile, double pressed contours

Steel thickness: 1/16" (1.5 mm) frame / 0.04" (1.0 mm) outer sheet

Insulation: Mineral wool + SYMMER-XPS foam (2" total)

Door leaf construction: Laminated steel, reinforced with anti-cut pins (Ø ⅝")

Locks: Kale 252/R w/b main lock + Securemme night latch

Cylinder: Mottura high-security mechanism

Hardware: RDA Forme Q handle set

Finish: Anthracite (RAL 7016), galvanized steel coating

The Rio S Loft is a statement of modern architecture — combining armored steel strength with elegant glass and refined design.

Built on a reinforced curved steel frame (4" / 100 mm) with mineral wool insulation and SYMMER-XPS thermal core, this door provides exceptional soundproofing, energy efficiency, and weather protection for Canadian homes.

Its 3 3/8" (85 mm) insulated steel slab and stainless-steel threshold ensure long-term stability, while four anti-cut pins, a Mottura high-security cylinder, and Kale 252/R multipoint lock deliver true peace of mind.

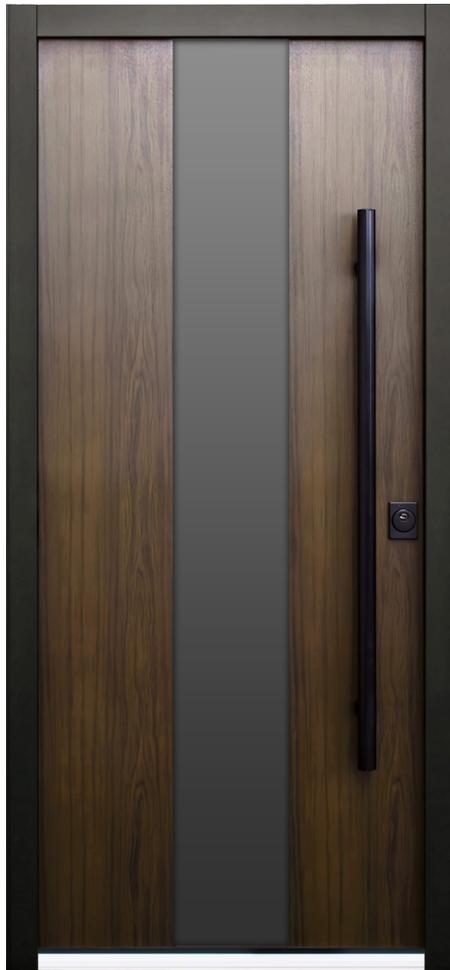

The model features a tinted glass insert that adds light without sacrificing privacy and can be complemented with optional side-lights for a wider, more expressive entrance.

Finished with a premium RDA Forme Q handle, the Rio S Loft unites modern elegance, strength, and comfort — built to perform and impress for decades.

VEGA MAXI

Anthracite Finish

Oak Finish

Technical Highlights

Available sizes: 34" × 81½" or 38" × 81½" (nominal)

Frame width: 4" (100 mm) curved steel profile, double pressed contours

Steel thickness: 1/16" (1.5 mm) frame / 0.04" (1.0 mm) outer sheet

Insulation: Mineral wool + SYMMER-XPS foam (2" total)

Door leaf construction: Laminated galvanized steel with four anti-cut pins (Ø ⅝")

Locks: Securemme 2613 multipoint system

Cylinder: Mottura high-security mechanism

Armor plate: Secur.Pro reinforced

Hardware: DMD 1200 handle set

Finish: Anthracite (RAL 7016), galvanized steel coating

The Vega Maxi blends refined design with armored strength — a perfect balance of security, style, and performance.

Its reinforced curved steel frame (4" / 100 mm) and insulated 3 ¾" (85 mm) slab provide outstanding energy efficiency, soundproofing, and weather protection for Canadian homes.

A tinted safety glass insert adds light and elegance while preserving privacy, and optional side-lights create a bold, panoramic entryway.

Inside, mineral wool and SYMMER-XPS insulation, laminated edges, and galvanized steel panels ensure lasting durability.

Equipped with a Securemme 2613 multipoint lock, Mottura cylinder, and Secure Pro armor plate, Vega Maxi guarantees maximum protection with timeless style.

Available in Anthracite (RAL 7016) or Oak finish, complemented by a DMD 1200 handle — it's where European craftsmanship meets Canadian resilience.
